### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 14-30, and 38-49, drawn to client verification of certificates delivered by a certificate authority via the use of hash values to establish trust levels, classified in class 713, subclass 156.
- II. Claims 7-13 and 31-37, drawn to certificate delivery and validation via the use of SSL handshaking and certificate chain containing a root certificate, classified in class 709, subclass 237.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as validation of certificates provided by a central certificate authority and establishing a trust level based on the certificate without the use of handshaking. Invention II has a separate utility such as using SSL handshaking to ensure secure certificate delivery. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Eamon Wall on 9/7/2005 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Wall called back on 9/8/2005 requesting that the examiner send in a written restriction requirement so that he may further discuss the matter with his client first.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
